tempo of *160*...

Four to the floor kick drum beat, with hihats in
Euclidean rhythms at a time signature of *4/4*
and tempo of *128*...

Prompts:

- Descriptive prompt inputs work best: you can use adjectives to describe the sound (e.g. "high quality" or "clear") and make the prompt context specific (e.g., "water stream in a forest" instead of "stream").
- It's best to use general terms like 'cat' or 'dog' instead of specific names or abstract objects that the model may not be familiar with.
